Electoral structure review - Hume City Council - Response Submission
Bienne Tam - Jacana - 06 November 2023, 11:39 pm

I support Model 2 because the names for each ward are easy to remember and resonates with voters better than the other two.

Secondly, the population distribution for each ward is more evenly distributed than Model 3 in particular.

Thirdly, the dividing lines for boundaries are clearer and easier to follow and recognise than Model 1 or Model 3.

Just check this out for further details on the map:
