

Electoral structure review - Stonnington City Council - Response Submission
Tim Ross - Glen Iris - 24 July 2023, 05:47 pm

1. The documentation for the review provides no context to the need for single councillor wards. I understand there has been a change to the Act but that in itself does not outline the benefits for any such change. What is the justification for the cost and activity required to make these changes. These feels cosmetic with no tangible difference in operation of the council.
2. Option 2 for Stonnington Council provides the best boundaries to reflect the mix of the municipality.
3. Option 1 has bizarre geographical borders that make little sense.
4. Option 3 is a longitudinal separation that does not recognise the areas of the municipality.
