

**Ward boundary review - Greater Dandenong City Council - Response Submission
Alex Breskin - Mentone - 18 March 2024, 03:00 pm**

I am writing this submission in support of Model 2.

Of the two models provided by the commission, it appears the first model has created an enormous Dandenong Ward, of which it will be too difficult for an individual councillor to manage the competing needs for the interests of both Green Wedge land holders, Industrial land holders and Residents in Dandenong. These unique features are better catered for in Model 2, where this distribution of interests is cleanly differentiated between Keysborough South ward and in Dandenong Ward, while also sharing the geographic load between the two.
