

**Electoral structure review - Campaspe Shire Council - Preliminary Submission  
Glenn MADDOCK - KYABRAM - 21 February 2023, 10:17 pm**

The current ward structure for Campaspe Shire Council works well so why change it.

The amalgamation of the Shires to form Campaspe Shire Council promised a great deal that has not been delivered and focus in the base of operations in Echuca seems to have issues addressed promptly.

Areas outside of Echuca battle with the assistance of their local Councillor/s to achieve even basic needs.

I propose that the Nine Councillors be retained as the Shire of Campaspe is growing.

If we need to change from the present five wards; I propose that a three ward structure of roughly the same number of electors in each ward; with three Councillors elected in each ward.

With the present Echuca ward having the highest population I propose that the growth area to the west be excised and that group of electors be in the Western ward as per my map submitted.
