

**Electoral structure review - Wyndham City Council - Response Submission**  
**Nurul Khan - Werribee - 22 November 2023, 09:39 am**

I have read the report and it appears that Model 2 is clearly the model most supported by the Panel based on their report. I am also in the same view as the panel. It does not split a number of local neighbourhoods in half in each suburb like Model 1 and is going to cause the least disruption given the model largely reflects the existing ward boundaries for the past decade. There is no point in dividing the number of local neighbourhoods where there is a better option without division. This is why I support Model 2.
