Subject: Formal Endorsement of Model 2 for Ward Boundary Adjustment

Dear Esteemed Panel Members,

I am writing to formally express my endorsement of Model 2 from the two alternatives under consideration for the proposed ward boundary adjustments.

Upon careful consideration, I find that Model 1 appears to neglect the substantial implications of anticipated population changes. The envisaged realignment of certain suburban areas across multiple wards in Model 1 raises concerns about the potential hindrance to local councillors in clearly delineating the constituents they represent.

In stark contrast, Model 2 impressively establishes unequivocal boundaries around each suburb. This approach not only enhances clarity for residents but also addresses the imperative quota requirements seamlessly. The meticulous attention to each suburb's distinctiveness in Model 2 ensures a more effective representation of local interests.

Given these considerations, I firmly believe that Model 2 is the optimal choice for fostering transparency and effective governance in our community. I trust that my endorsement will be taken into account as the panel deliberates on this critical matter.

Thank you for your dedicated service in shaping the future of our local governance.

Respectfully,

Tully
