

**Electoral structure review - Frankston City Council - Response Submission
Michael Tellesson - Seaford - 02 August 2023, 05:00 pm**

Hello, Review Panel,

Here are my thoughts on the 3 options given for Frankston.

(1) Model 1:

- Our population is growing and it does not make sense to reduce the number of councillors.
- The ward names are reasonably relatable.
- Don't like the elongated wards, particularly "Mount Grand Ward.

(2) Model 2:

- Prefer the 9 Councillors
- The Elongated Wards cross many boundaries and are not relatable.
- The Coastal Ward is far too long and excludes too much of "Coastal Seaford". I live 400m from the beach and yet would be allocated to an inland ward. The wards split too many suburbs - dividing natural communities.

(3) Model 3:

- By far my preferred model.
- Fairly compact wards which most closely represent existing communities.
- The proposed ward names are the most relatable.
- Ward boundaries are natural.
